

Site Synopsis

If you are a woman who is having problems with incontinence (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/incontinence/urinary-incontinence/>), such as the urge to urinate frequently, or prolapse (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/pelvic-organ-prolapse/>), where your vaginal anatomy is protruding outside your body, Dr. Labib Riachi (<http://riachisurgery.com/labib-riachi-surgery/labib-riachi-cv-info/labib-edison-riachi-cv/>) can help you in a number of ways. If you have heavy periods (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/heavy-period/heavy-periods-ending-excessive-bleeding/>), an abnormal pap smear (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/abnormal-pap-smear/>) or endometriosis (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/endometriosis/>) or a host of other gynecological problems, Dr. Riachi (<http://riachisurgery.com/labib-riachi-surgery/labib-riachi-cv-info/labib-edison-riachi-cv/>) can help you.

As one of the world's leading urogynecologists, Dr. Riachi (<http://riachisurgery.com/labib-riachi-surgery/labib-riachi-cv-info/labib-edison-riachi-cv/>) has traveled the globe to teach other physicians the procedures he performs. His mission, as he sees it, is to try to help every woman who needs diagnosis and treatment for their female incontinence (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/incontinence/urinary-incontinence/>) and prolapse (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/pelvic-organ-prolapse/>) problems.

The specialty of urogynecology involves the urinary aspects of gynecology, and is a specialty that has grown as the staggering number of women with urinary problems have been estimated, documented and brought to light.

Dr. Riachi (<http://riachisurgery.com/labib-riachi-surgery/labib-riachi-cv-info/labib-edison-riachi-cv/>)'s approach to female urinary incontinence (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/incontinence/urinary-incontinence/>) incorporates different approaches to stress incontinence (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/stress-urinary-incontinence/stress-urinary-incontinence-sui-and-treatment/>), which is the leakage or urine upon any pressure on the bladder, urge incontinence (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/incontinence/urinary-incontinence/>), which is the constant and uncontrollable urge to urinate (with leakage), and mixed incontinence (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/incontinence/urinary-incontinence/>).

For patients with female vaginal prolapse (<http://riachisurgery.com/labib-riachi-surgery/diagnosis-treatments/pelvic-organ-prolapse/>), Dr. Riachi (<http://riachisurgery.com/labib-riachi-surgery/labib-riachi-cv-info/labib-edison-riachi-cv/>) has surgical options that include the use of plastic mesh to "hold up" a woman's anatomy, exercise programs and other options.

Dr. Riachi (<http://riachisurgery.com/labib-riachi-surgery/labib-riachi-cv-info/labib-edison-riachi-cv/>) uses various tools at his disposal to help his patients, from conservative methods such as pelvic floor exercises to radical methods like minimally-invasive surgery. His dedicated and compassionate staff works with women of all ages to help them regain what they thought they could never have--a normal life, free of constant discomfort, worry and (in many cases) shame.

The psychological effects of these problems are devastating to many women. According to Dr. Riachi (<http://riachisurgery.com/labib-riachi-surgery/labib-riachi-cv-info/labib-edison-riachi-cv/>), while he is a urogynecologist by training, an additional benefit of his work is that it helps solve emotional and psychological issues many women have from dealing with these problems on a daily basis.

This web site contains a lot of the press material (<http://riachisurgery.com/labib-riachi-surgery/dr-labib-riachi-in-media/>) that has been written about Dr. Riachi (<http://riachisurgery.com/labib-riachi-surgery/labib-riachi-cv-info/labib-edison-riachi-cv/>), and TV clips (<http://riachisurgery.com/labib-riachi-surgery/dr-labib-riachi-in-media/>) from regional and national media outlets.

Dr. Riachi (<http://riachisurgery.com/labib-riachi-surgery/labib-riachi-cv-info/labib-edison-riachi-cv/>) is a double board certified in the specialties of obstetrics/ gynecology and Female pelvic medicine/ Pelvic reconstructive surgery.

He occupied the position of Chief of Robotic Surgery and director of Urogynecology as well as the chairman of the Obstetrics and gynecology at Trinitas regional medical center in New Jersey.

He is a pioneering doctor in several ways. He had decided to dedicate his life to assisting others in need of medical care. Dr. Riachi has also performed new and unique medical procedures that have aided and changed the lives of many of his patients.

He has been instrumental in teaching surgery and medicine for doctors, students and hospital staff.

Dr. Riachi has received many awards and certifications in recognition of his service to his patients. These include:

- Certificate of appreciation award from the Philadelphia College of Osteopathic Medicine, July 2015
